SUMMARY

Flutter Developer with 2+ years of hands-on experience building and shipping production-ready cross-platform mobile and web applications, including ERP systems. Proficient in Dart (Flutter), Swift, Kotlin, clean architecture, state management, RESTful APIs, Firebase, Supabase, and Flutter Web. Delivered multiple apps to Google Play Store and App Store, with strong focus on scalable architecture, performance optimization, and real-world business solutions. Experienced in freelance and team environments, delivering high-quality, maintainable code for both startups and enterprise clients.

EXPERIENCE

Freelance Flutter Developer

2025 – Present

- Building and maintaining production-ready mobile & web applications for various clients.
- Delivered apps to Google Play Store and App Store.
- Developed custom ERP system using Flutter Web with complex business workflows, multi-role access, and scalable clean architecture.
- Technologies: Flutter, Dart, Flutter Web, Clean Architecture, REST API, Firebase, Supabase, Android & iOS Integration.

PT BALI PROJECT INDONESIA – Ambarawa, Semarang, Indonesia

Flutter Developer (July 2025 – January 2026)

- Developed **OpenJob**, a cross-platform job search mobile app using Flutter; implemented BLoC state management, Firebase Cloud Messaging (FCM) for push notifications, and clean architecture for scalability — project reached near-release stage but was halted due to company restructuring and layoffs.
- Built **Battery Bird**, a portable power bank rental service app; completed full UI/UX implementation with responsive design and clean architecture foundation — backend integration pending due to company PHK.
- Collaborated with UI/UX designers and backend engineers to ensure code maintainability and performance optimization during active development phases.

PT ORDO TEKNOLOGI KARYA – Surabaya, Indonesia

Mobile Developer Intern (July 2024 - November 2024)

- Contributed to **Kolam Ulam** (Google Play Store, 100+ downloads), an aquaculture management app for freshwater fish farmers; developed features including cultivation evaluation calculators, real-time expert consultations, sustainability guides, and e-commerce shop integration using Flutter, RESTful APIs, and state management (BLoC/GetX).
- Contributed to **Azarine App** (internal company invoice management tool); developed multiple UI components for performance monitoring, efficiency tracking, and simplified invoice handling with role-based access (e.g., General Manager, Manager, Supervisor, Staff) using Flutter and clean architecture principles — app requires company login credentials and is not publicly accessible.
- Integrated Firebase services (Authentication, Firestore, Cloud Storage, Cloud Messaging) to support user authentication, data storage, and real-time notifications across app features.

- Participated in team code reviews, debugging, and best practices application to improve code quality, scalability, and production readiness.

PROJECTS

- **ARM** (Activation Resource Management) – Equipment Rental System (Flutter)
 - ❖ Developed a comprehensive equipment rental and asset management system as part of Flavor 3 enterprise suite for event organizers.
 - ❖ Features include planning tools, real-time monitoring, post-event evaluation, and premium UI/UX with clean architecture.
 - ❖ Available on Google Play Store and App Store.

Google Play Store:

<https://play.google.com/store/apps/developer?id=ARM+-+Activation+Resources+Management>

Apple App Store:

<https://apps.apple.com/us/developer/pt-mega-wira-mandiri/id1497270724>

- **Tetra Pulsa** – Pulsa to Balance Converter (Flutter)
 - ❖ Built a reliable mobile application for converting pulsa (mobile credit) into digital saldo/balance.
 - ❖ Focused on fast transaction processing, secure conversion flow, real-time balance monitoring, and user-friendly interface.
 - ❖ Available on Google Play Store and App Store.

Google Play Store:

<https://play.google.com/store/apps/details?id=com.tetra.pulsa&pli=1>

Apple App Store:

<https://apps.apple.com/id/app/tetra-pulsa/id6458982998>

- **Kolam Ulam** – Aquaculture Management App (Flutter)
 - ❖ Developed a comprehensive freshwater aquaculture management application for Indonesian fish farmers.
 - ❖ Features include cultivation evaluation calculators, real-time expert consultation, sustainability guidance, and an aquaculture marketplace.
 - ❖ Supports hundreds of fish farmers with a user-friendly interface and has achieved 100+ downloads on the Play Store.
 - ❖ Google Play Store:

<https://play.google.com/store/apps/details?id=com.kolam.ulam.app>

- **EasyCool** – AC Service Booking App (Flutter)
 - ❖ Built a full-featured AC service booking and reporting application with complete offline mode support.
 - ❖ Enables users to book technicians, track service progress, and manage maintenance types (cleaning, repair, installation, Freon refill).
 - ❖ Focused on delivering a simple and efficient user experience for both technicians and customers.
 - ❖ Google Play Store:

<https://play.google.com/store/apps/details?id=com.easycolor.id>

- **ERP System (Flutter Web)** – Enterprise Resource Planning
 - ❖ Developed full-scale ERP systems (including attendance module) with complex business workflows and multi-role access control.
 - ❖ One implementation delivered using Flutter Web for browser-based operations (CV. Lenna Usaha Sejati).
 - ❖ Handles medium to large-scale enterprise operational needs with high scalability and clean architecture.

- **Fun Club Tutoring** – E-Learning App (Flutter)
 - ❖ Developed an interactive mathematics learning application with two versions (student & teacher), optimized for tablets.
 - ❖ Key features include stylus-based free drawing, landscape orientation, and real-time data syncing.
 - ❖ Provides an engaging and flexible learning experience for both students and tutors.

EDUCATION

SMKN 1 KEDIRI (2022 - 2025)

High School Diploma, Computer Network and Telecommunications

TECHNICAL SKILLS

- **Programming Languages & Frameworks:** Dart (Flutter), Kotlin, Swift, Python, Golang
- **Mobile & Web Development:** Cross-Platform Development, Flutter Web, Clean Architecture, RESTful API, UI/UX Implementation, App Store & Play Store Deployment, ERP Systems
- **State Management:** BLoC, GetX, Provider, Riverpod
- **Tools & Services:** Firebase (Auth, Firestore, Cloud Storage, FCM), Supabase, Google Cloud Platform, Git, GitHub, GitLab, Visual Studio Code
- **Other:** Code Review, Debugging, Performance Optimization, Team Collaboration
